

PRUTHVIRAJ KALE

AI Automation & AI/ML Developer

Maharashtra, India • pruthvikale25@gmail.com • github.com/pruthvi25-K • LinkedIn: [YOUR LINKEDIN] • Portfolio: [YOUR PORTFOLIO]

SUMMARY

Aspiring AI/ML developer focused on building practical AI-powered applications and automation workflows. Currently developing skills in Python, web technologies, APIs, n8n and AI-assisted development, with a growing focus on AI agents, LLM applications and intelligent automation. Interested in turning real-world problems into useful software solutions.

EDUCATION

Incoming CSE (AI/ML) Student

Computer Science & Engineering — Artificial Intelligence & Machine Learning

College name and dates to be added after admission/confirmation.

TECHNICAL SKILLS

Programming	Python • JavaScript • HTML • CSS
AI & Automation	n8n • AI APIs • Prompt Engineering • AI-assisted development
Development Tools	Git • GitHub • Cursor • Antigravity
Currently Learning	AI Agents • LLM Applications • RAG • Databases • Advanced API Integration

PROJECTS

AI-Assisted Developer Portfolio

Designed and developed a responsive personal portfolio using AI-assisted development, with interactive UI, animation and modern web technologies.

Tech: HTML • CSS • JavaScript • AI-assisted development **Links:** [LIVE DEMO] • GitHub

AI Lead Automation — Planned / Building

Planned n8n workflow for capturing leads, processing information with AI and automating follow-up actions across connected services.

Planned Tech: n8n • AI API • Webhooks • APIs

AI Customer Support Assistant — Planned / Building

Planned AI-powered support workflow for answering customer questions and routing relevant information through an automated workflow.

Planned Tech: AI API • n8n • Webhooks • JavaScript

CURRENT LEARNING

AI automation • n8n workflows • vibe coding • AI APIs • AI agents • LLM applications • RAG • AI/ML fundamentals

AREAS OF INTEREST

AI automation • AI-powered websites • AI chatbots • workflow automation • intelligent applications

Note: LinkedIn, portfolio, college details and project links should be added when available. Planned/Building projects should be updated only after they are genuinely built.
